EC-Council — Building A Culture Of Security
CSA Sweden Chapter · SIG SECURITY

A Decade of Shaping Sweden's Cybersecurity Future

For the past ten years, the IT Security Insights Conference has been more than just an event — it has been a meeting ground for the brightest minds and strongest voices in Sweden's cybersecurity landscape. As we step into our 10th Edition, we reflect on a decade of progress while looking ahead to the pressing challenges that will define the next era of digital security.

Cybersecurity today is not just a technical issue; it is a strategic imperative that affects every layer of an organisation. Medium to large enterprises in Sweden and across the globe are navigating an increasingly complex environment — balancing innovation, regulation, and resilience against a backdrop of ever-evolving threats. This year's programme is designed to equip leaders with clarity and direction, combining visionary keynotes, real-world case studies, interactive panels, and sector-focused workshops.

But what truly defines IT Security Insights is its community. Over the years, we've seen leaders — CISOs, CIOs, CTOs, heads of IT, and compliance experts — come together not just to share knowledge, but to build partnerships that last beyond the conference walls. It is this spirit of collaboration that transforms discussions into action and ideas into innovation.

As we celebrate this milestone edition, our mission remains unchanged: to inspire, connect, and empower the professionals shaping the future of cybersecurity. We invite you to join us, not only to mark a decade of achievement, but to be part of the conversations that will drive the next decade of resilience and growth.

We are looking forward to seeing you on the 4th of March, 2026 at Hotel Birger Jarl!

Sincerely,

Robert Kitunzi

Event Project Manager

Practical Information

Date:

04th March 2026

Location:

Venue: Hotel Birger Jarl
Address: Tulegatan 8, 113 53 Stockholm, Sweden

Ticket Options:

Early Bird Ticket	**SEK 980**

(Limited to end-users and not applicable to vendor representatives & consultants)
Early Bird Pricing Ends on 30 December, 2025

Group Ticket	**SEK 1480**

Applies when you register more than 1 person

(Limited only to end-users and not applicable to vendor representatives & consultants).

Single Ticket	**SEK 1980**

(Exclusively limited to end-users and not applicable to vendor representatives & consultants)

Vendor Ticket	**SEK 3480**

(Applies for visitors from vendor companies)

*All prices are excluding VAT

Note: All tickets give you full access to all sessions and registration fee covers food & refreshments including "Closing Networking Reception".

John Wallhoff
Event Chairman & Moderator
Co-Founder, B4 Investigate

John Wallhoff (CISA, CISM, CISSP), Co-Founder and Board Member at B4 Investigate and formerly the President of ISACA Sweden Chapter & independent advisor. He is an experienced expert in the field of IT-Governance, IT Service Management and Information Security. Over the past 25 years he has been working with a wide range of organisations in different industries/sectors.

Alexandra Searle
Head of Business Operations,
Ericsson

Alexandra Searle currently Heading Operations and Transformation in Ericsson's Product Lifecycle Management Space– strong business, security, and compliance experience across global technology and telecommunications. She has led major operational, governance, and transformation programs within Ericsson's Core Networks and Digital Services, integrating security and privacy frameworks into business strategy and execution. With a background spanning compliance, regulatory management, and operational leadership, Alexandra focuses on practical, business-driven approaches to risk, resilience, and secure growth.

Elie El-Feghaly
Cybersecurity Executive & CISP
Advisor, Vizrt

Elie El-Feghaly is a Global Chief Security Officer with 20+ years of experience helping organizations navigate cybersecurity, digital risk, and business transformation. His career has spanned finance, healthcare, and media industries where resilience and compliance are critical to growth. He works at the intersection of technology, governance, and strategy, advising boards and executive teams on how to turn cybersecurity from a technical problem into a business enabler. He has guided organizations through M&A due diligence, global regulatory shifts (DORA, GDPR, NIS2, ISO, SEC rules), and enterprise transformations that embed security into culture and operations.

Beyond his executive role, he leads the CISO community for a venture capital firm, enabling portfolio companies to strengthen governance, share best practices, and raise their cyber maturity. This board-level advisory work has reinforced his focus on risk oversight, investment strategy, and stakeholder trust.

Helena Örtholm
Senior Cybersecurity Governance &
Assurance Specialist, Skanska AB

Helena Örtholm started out as a lawyer working for the Swedish House Owners Association assisting the organization and its members with property rights and civil law issues. After some years she shifted focus to personal data rights/privacy issues and contract law, information security and IT audits when started working at EY and then later on at Transcendent Group, and she has been working with these topics as a consultant for approximately 15 years before starting to work as Chief Security Officer at the former TDC in 2013. With the Tele2 acquisition of TDC Helena became CISO and DPO for Tele2 Sweden and with the re-organization of Tele2 due to the ensuing merger with ComHem she held a position as as Group Privacy Officer, Data Protection Officer for Tele2 Sweden and ComHem as well as expanding her role in driving the risk work within the organization as Head of Operational Risk Management. In 2022 Helena joined Skanska Sweden in the role of Informationssäkerhetschef. Since the 1st of January in 2023 she now holds the position of Head of Cybersecurity Governance & Assurance in the new global cybersecurity organization.

Johan Åtting
CISO, Sectra AB

Johan Åtting has 25 years professional experience from various industries such as MedTech, Bank & Finance, Telecoms and Transport where the last 16 years have been within MedTech/Healthcare. Since 2016 he holds the position as Group CISO and DPO at the Medical Imaging IT and Cybersecurity firm Sectra.

Michael Popoff
Senior Scientist, RISE

Michael Popoff is a senior scientist at RISE Research Institutes of Sweden. Michael works with applied research and helps RISE partners to understand and apply the latest in digital technologies within privacy preservation, information security, AI/ML, telecom, IoT, and post-quantum technologies in the public and private sectors including real estate, agriculture, energy, health, and manufacturing. Michael holds a PhD in physics from the Royal Institute of Technology (KTH) in Stockholm.

Jan Branzell
CEO, Veriscan Security AB

Jan Branzell is CEO of Veriscan Security but also active in ISO/IEC JTC 1 WG 13 Information Technology – Trustworthiness, as well as member of CEN–Cenelec JTC 13 Cyber security and data protection. He has a long experience working with management of information and cyber security and is also international editor of several standards within the ISO 27000 family.
Peter Csicsay
Sales Director, INALOGY A.S.

Sales Director BIO: With over 16 years of experience in IT and management, Peter Csicsay holds the position of Sales Director. During his career, he has held similar positions at Exclusive Networks, Oracle, IBM, and Dell.

Jabu Mtsweni
Head of Information & Cyber Security Centre, CSIR

Dr Jabu Mtsweni is the Head of Information and Cyber Security Centre and Chief Researcher at the Council for Scientific and Industrial Research (CSIR), NRF-Rated Researcher (C2), and a Certified Cybersecurity Manager, Research Fellow at the Stellenbosch University, and Technical Leader of the National Policy Data Observatory. Dr Jabu Mtsweni is an accomplished researcher and technology expert in the field of Computer Science, particularly in the areas of Cyber and Information Security. He holds a PhD degree in Computer Science from the University of South Africa. He has published over 90 peer-reviewed conference and journal articles over the years in different forums focusing on ICT4development, socially relevant computing, information and cybersecurity, and data science. He regularly speaks as an invited speaker at local and international cybersecurity conferences. He has worked with both the public and private sector in large and complex ICT projects.

Dimitrios Stergiou
CISO, Taptap Send

Dimitrios Stergiou Dimitrios is currently employed as CISO at Taptap Send. He is an experienced senior Information security and Risk professional with over 20 years of experience. Before joining the Taptap Send, Dimitrios held positions at Wayflyer Group, Trustly Group AB, Modern Times Group, NetEnt, Entraction, Innova S.A, and Intracom S.A.Dimitrios holds an M.Sc. in Information Security, as well as an MBA, and is a Certified Lead Implementer for ISO 27001:2013, Certified Information Security Manager (CISM), Certified Information Systems Auditor (CISA), Certified Risk and Information Systems Control (CRISC) professional, Certified Cloud Security Professional (CCSP) and Certified Information Systems Security Professional (CISSP). Dimitrios is also a certified Certified Information Privacy Manager (CIPM) and Certified Information Privacy Professional (CIPP/E). Dimitrios' Information Security focus lies with standards compliance, technical security evaluation, risk management, secure development lifecycle, SecDevOps, and social engineering.

Sami Petäjäsoja
CEO, SensorFleet Oy

Mr. Sami Petäjäsoja has been working on cyber security since 2006 in various product line owner and executive roles in both startups and large corporations, covering security testing, threat intelligence and most recently security monitoring technologies. In 2011, Sami established Codenomicon operations Singapore and following acquisition of the parent company, relocated to the US to work with Synopsys in Silicon Valley.

Realisation that the network security segment is lagging application centric monitoring platforms lead to the next chapter in his career with relocation back to Finland and co-founding of SensorFleet. Over his career, Sami has been working on cybersecurity projects for large enterprises, government agencies and defence organisations, authored papers and presented at international conferences.
Peter Csicsay´s BIO: With over 16 years of experience in IT and management,
Peter Csicsay holds the position of Sales Director. During his career, he has held similar positions at Exclusive Networks, Oracle, IBM, and Dell.

Bea Khosravi
IAM Specialist, Vattenfall AB

With a background spanning law, business development, and technology, **Bea Khosravi c**ombines a deep understanding of digital identity with hands-on experience from complex security initiatives. In her role at Vattenfall, she works with analysis and strategy within IAM in a large organization. In her talk, Bea will share insights on passkeys—a technology that promises a passwordless, more secure, and more user-friendly alternative for the future of logins. With both clarity and thoughtfulness, she highlights the challenges and opportunities that lie ahead.

Anne-Marie Löwinder
Founder & CEO, Amelsec

Anne-Marie Eklund Löwinder is one of Sweden's leading experts in information and IT security, with approximately 40 years of experience in strategic and operational security work. During her 20 years as CISO at the Internet Foundation, she led the organization through ISO 27000 certification. She now runs her own company, Amelsec.

She is a member of the Royal Swedish Academy of Engineering Sciences, Division XII, and serves on the boards of the Swedish Transport Administration, the Swedish Defence Materiel Administration, and the Swedish Tax Agency. She has for many years been a member of the Swedish Civil Contingencies Agency's Cybersecurity Council and has also served on the government's AI Commission. Anne-Marie's work in information and cybersecurity has been recognized with several awards, and she became the first Swede to be inducted into the Internet Hall of Fame.

Christian Källqvist
IT Security Architect, Aktiebolaget Svensk Exportkredit(SEK)

"Senior Cybersecurity Expert and Security Architect with a passionate business focus, combining technical expertise with strategic leadership. Experienced across cybersecurity architecture, governance, risk, compliance, and cloud security (Azure), with an interest to translate complex security challenges into actionable, business-aligned solutions.

With a background as IT Manager, Project Manager, Product Owner, and PMP-certified leader, I bridge IT and business, lead cross-functional initiatives, and negotiate solutions that deliver measurable business value. Like creating structure, driving change, and aligning stakeholders around long-term, secure outcomes.

I'm passionate about building security awareness from technical teams to executive leadership. Have worked with digital transformation, AI adoption, ethical hacking, and strategic architecture—delivering security that enables innovation, resilience, and growth."

EC-Council
Building A Culture Of Security

Faizal Shabeer
Senior Country Manager – (UK & Europe), EC Council

Faizal Shabeer brings over 23 years of experience in the Information Technology sector, with the past 15 years dedicated to Cybersecurity. He previously led Channel Development and Engagement at Kaspersky Labs, overseeing operations across 25 countries in the GCC, Levant, West Asia, and North Africa. Prior to that, he managed Consumer Partnerships at McAfee, focusing on the Middle East and North Africa and maintaining direct relationships with key players in the telecommunications sector. In addition to his corporate roles, Faizal founded and operated a comprehensive Cybersecurity Solutions and Consulting firm based in Dubai, UAE. He has been actively involved in business networking communities, notably serving as Vice President of BNI (Business Network International), the world's largest business referral organization. Currently serving as a Senior Country Manager, Faizal is responsible for driving strategic business initiatives across 18 countries in the UK and Europe. His role emphasizes channel growth and development, close collaboration with enterprise clients, and advancing EC-Council's mission to bridge the cybersecurity skills gap by delivering expert consultancy, solutions, and services to combat cyber threats.

Epiroc

Urmas Aamisepp
Head of Information Security, Epiroc

Urmas Aamisepp Head of Information Security at Epiroc since 2021, Urmas has over two decades of experience in cybersecurity and IT risk management. With a Computer Science background, he has worked in the field since 1997, co-founding High Performance Systems and holding senior roles at DXC. His leadership journey includes serving as CISO at DeLaval and Clas Ohlson, driving enterprise security strategies across global organizations.

försvarsföretagen

Ronja Ahlberg
Director Cyber Defence, SOFF

Matilda Tidlund
Group CISO Aller A/S

Time	Session
07:30	**Registration & Morning Breakfast** The conference begins with a breakfast for all participants. Arrive early to connect with your peers and meet our partners in the exhibition area.
08:00	**Chairman's Opening Remarks:** **John Wallhoff,** Event Moderator
08:15	**Co-Host Partner KeynoteTBA**
08:40	**Hands-on post-quantum transition and beyond** Quantum computers have the potential to break widely used public-key cryptosystems, such as RSA and elliptic-curve cryptography, which are a part of our current communication infrastructure. Post-quantum resilience is a field to address these vulnerabilities to ensure the long-term security of our data and communications. We address the practical aspects of transition to post-quantum cryptography covering strategy, inventory, execution, and validation as well as touch upon outstanding challenges of quantum key distribution and what might lie ahead. **Michael Popoff** Senior Scientist, RISE
09:05	**Building Cyber Resilience Through Collaboration** **Key takeaways:** - Tackling sophisticated cyber threats demands a united approach. By exchanging threat intelligence, we strengthen our collective ability to detect, respond to, and prevent emerging risks. **Ronja Ahlberg** Director Cyber Defence, SOFF
09:30	**IT Security Insights 2026 Breakout Sessions - TBA** Dive into the morning dynamic breakout sessions with hands-on workshops and live demos. Choose from four exciting parallel tracks, each powered by our supporting partners. Commvault
09:55	**Networking Coffee Break & Visiting The Expo Area**
10:15	**IT Security Insights 2026 Partner Pitches** INALOGY **Peter Csicsay** Sales Director, INALOGY A.S. SENSORFLEET **Sami Petäjäsoja** CEO, SensorFleet Oy

10:40	**Digital Sovereignty, Security and Trustworthiness** **Key takeaways:** • Is security a part of digital sovereignty? • Trustworthiness is building relationships - how does information technology fit into it? • Are these three subjects related, and if so, how? **Veriscan** **Jan Branzell** CEO, Veriscan Security AB
11:05	**Implementing Security Frameworks in areas where there are intersecting requirements** **Key takeaways:** • How to build a security team with the correct competence? • Aligning requirements **ERICSSON** **Alexandra Searle** Head of Business Operations, Ericsson
11:35	**Resilience based on the three pillars of Incident Management, Business Continuity and Crisis Management** Business Continuity and Crisis Management Organizational resilience is often discussed as a single capability, but in practice it is built on three distinct yet closely connected pillars: Incident Management, Business Continuity, and Crisis Management. These disciplines are frequently mixed up or used interchangeably, which can create gaps in preparedness and response. **Key takeaways:** • Johan will explore the three pillars of resilience—Incident Management, Business Continuity, and Crisis Management — explaining their distinct purposes, how they work together, and why all three are essential to building a resilient organization. **SECTRA** **Johan Åtting** CISO, Sectra AB
12:00	**Networking Lunch, Visiting The Expo Area & Hosting One-to-One Meetings**

13:00

IT Security Insights 2026 Round Table Sessions

We invite you to participate in our distinguished roundtable sessions, providing a platform to voice your perspectives and engage in knowledge exchange with esteemed cybersecurity experts. Discussions will cover a wide range of critical topics shaping the cybersecurity landscape. The format will include two rotations, with delegates transitioning to new tables every 40 minutes to foster broader interaction.

Nordea

Cyber Security in a more unpredictable world: Lessons learned from the frontiers."

"Many organizations are struggling to adapt to an increasingly unpredictable world. Economic recession and geopolitical instability has made it even more challenging to stay on top of Cyber Security. With Generative AI in the hands of adversaries we now have to rethink our understanding of the cyber threat landscape.

Key Takeaways:

- Have your organization been attacked in an increasing rate compared to previously?
- Are you scaling up your Cyber Security and how is this done while in economic uncertainty?
- Have the type of controls you implement changed to deal with immediate threats? How do you balance this against your long-term plans?
- Have the geopolitical instability put new security topics on the agenda? For example Digital Soverignty in Cloud or Disaster Recovery?

Christian Abdelmassih
Senior IT Security Architect, Nordea

EC-Council
Building A Culture Of Security

Building an AI-Enhanced Cybersecurity Workforce: Upskilling for the Future

Session involves information related to the threats involved in our AI space and how do we mitigate AI based threats with enhancement on building AI based cybersecurity skills

Key takeaways:

- How do you build AI enhanced skills in cybersecurity ?
- What are the threats evolving under the AI space ?
- How does the Global AI Cybersecurity market look like ?
- How does EC-Council help in the AI space ?

Faizal Shabeer
Senior Country Manager – (UK & Europe), EC Council

VATTENFALL

Training for the Digital Age: Gamification, Behavioral Nudges & AI-driven Awareness

Here we can explore how modern awareness tools like phishing simulations, gamification and behavior-based nudges drive behavioral change, especially against evolving threats like AI-based phishing or deepfakes.

Bea Khosravi
IAM Specialist, Vattenfall AB

CSIR

Business Cybersecurity for Agentic AI: Maximizing benefits, minimizing risks

The rise of autonomous AI agents and generative AI presents a significant security paradox for organizations. While these technologies offer immense potential for productivity and efficiency by automating complex tasks and decision-making, they also introduce new and sophisticated security risks.

This roundtable will explore the security challenges and opportunities presented by agentic AI. We'll discuss how to balance the benefits of autonomous operations with the need for strong security protocols, examine potential attack vectors, and address the complex questions around accountability when AI agents make independent decisions. The goal is to provide actionable insights for security leaders and business executives to navigate this evolving landscape and protect their organizations.

Jabu Mtsweni
Head of Information & Cyber Security Centre, CSIR

vizrt

Bridging the gap between top management and technical persons

Let's be honest — in cybersecurity and tech, this gap is real.

- C-level leaders think in terms of revenue, market position, shareholder trust.
- Technical teams think in terms of system stability, vulnerabilities, compliance.
-

Both are right. But the friction — the miscommunication, the misaligned priorities — can cost companies time, money, and sometimes their reputation.

The session is about calling it out, unpacking it, and — most importantly — figuring out how to fix it."

Elie El-Feghaly
Cybersecurity Executive & CISP Advisor, Vizrt

SEK

"How to handle/protect the different information classes in your applications and databases: Public, Internal, Confidential and Restricted, Christian Källqvist IT Security Architect, SEK

Key takeaways:

- Automatically class your information based on rules or not
- Have different applications/databases/locations for Confidential and Restricted"
- Have all information in same application but with instructions how to handle the different classes

Christian Källqvist
IT Security Architect, Aktiebolaget Svensk Exportkredit(SEK)

Implementing Security Frameworks in areas where there are intersecting requirements

- How to build a security team with the correct competence?
- Aligning requirements

Alexandra Searle
Head of Business Operations, Ericsson

Dimitrios Stergiou, CISO Taptap Send - Table Session TBA

Dimitrios Stergiou
CISO, Taptap Send

Peter Johansson´s Round Table Session TBA

Peter Johansson
Regional Sales Manager, Onclik

TBA

Time	Session
14:20	**Afternoon Coffee Break & Visiting the Expo Area**
14:35	**IT Security Insights 2026 Breakout Sessions: TBA** Dive into our dynamic afternoon breakout sessions with hands-on workshops and live demos. Choose from four exciting parallel tracks, each powered by our supporting partners.
15:00	**Keynote TBA**
15:25	**"Legislation's impact on information security – or is it information security's impact on legislation? A brief overview of how the legislative requirements have changed over time."** Helena's keynote will provide a high-level overview of how cybersecurity and information security legislation has evolved over time. The session will trace the journey from early legislation that largely referred to "best practice" — without clearly defining specific requirements or implementation methods — to today's increasingly detailed and prescriptive regulatory frameworks such as DORA and NIS2. **Key takeaways:** • The keynote will explore how best practices have historically shaped legislation, gradually becoming formalised into binding legal requirements. This evolution will be illustrated through examples ranging from early regulatory principles dating back to the 1350s, through Swedish legislation such as Personuppgiftslagen, MSB's recommendations for the public sector, Lagen om elektronisk kommunikation and PTS regulations, to more recent frameworks including NIS1, DORA, and NIS2. • The session will conclude with reflections and forward-looking considerations on future regulatory developments, including potential implications of initiatives such as the Digital Omnibus, and how organisations can prepare for what comes next. **SKANSKA** **Helena Örtholm** Senior Cybersecurity Governance & Assurance Specialist, Skanska AB
15:45	**Afternoon Break & Visiting the Expo Area**
15:55	**Closing Keynote TBA**
16:20	**Cyber Resilience 2030 – What Will Define Success in the Next Decade?** We are approaching a transition from a stage with legal & regulatory requirements in focus into the world of quantum, AI and the unknown. This panel will discuss how these changes will reshape our profession, organisations, ways of working and the technology. **Matilda Tidlund** Group CISO Aller A/S (panelist) **John Wallhoff** Panel Moderator **Anne-Marie Löwinder** Founder & CEO, Amelsec(Panelist) **Urmas Aamisepp** Head of Information Security, Epiroc (Panelist)
17:00	**Chairman's Closing Remarks** **John Wallhoff** Event Chairman & Moderator Co-Founder, B4 Investigate
17:10	**Closing Networking Reception Starts**

CivSec is Sweden's premier cyber-security partner for organisations with critical, high-risk mandates. We design and operate end-to-end Governance, Risk & Compliance (GRC) frameworks that translate complex regulatory landscapes—NIS2, CRA, ISO 27001, GDPR, SOC 2, NIST—into clear, auditable processes, reinforced by a security-first culture and automated technology. Our total-defence expertise integrates continuity planning, incident-response and hybrid-threat management, bridging civil and military preparedness to keep essential services operational under any circumstance. A distinguishing capability is Secure AI: all AI-related services are grounded in empirical, evidence-based research performed in our dedicated on-prem AI lab, where solutions and services are rigorously tested, hardened and air-gapped before deployment. Equally, we are renowned for delivering large-scale national exercises, scenario-based workshops and hands-on training programmes. CivSec designs and runs immersive simulations, bespoke courses and expert lectures in cybersecurity and secure strategic cyber management, helping clients build a resilient workforce and a culture of proactive defence.

By combining deep cyber-risk insight, total-defence planning, trustworthy AI and world-class education, CivSec delivers resilient, future-proof protection for both public and private sector clients. To learn more visit: **www.civsec.se**

Commvault (NASDAQ: CVLT) is the gold standard in cyber resilience, helping more than 100,000 organizations to uncover, take action, and rapidly recover from cyber attacks - keeping data safe and businesses resilient and moving forward. Today, Commvault offers the only cyber resilience platform that combines the best data security and rapid recovery at enterprise scale across any workload, anywhere with advanced AI-driven automation - at the lowest TCO. To learn more visit: **www.commvault.com**

Inalogy is your reliable partner in securing digital assets via innovative solutions focusing on identity management, access management, privileged access management, and perimeter protection. Our specialization is integrating a range of customizable solutions based on open-source or commercial products to meet our clients' unique needs. Using the latest technology and expertise, we help organizations safeguard their valuable digital assets and data from today's constantly evolving cyber threats. Ensuring that your data is always secure with us gives you the freedom to focus on your business. To learn more visit: **www.inalogy.com.**

Keepit provides a next-level SaaS data protection platform purpose-built for the cloud. Securing data in a vendor-independent cloud safeguards essential business applications, boosts cyber resilience, and future-proofs data protection. Unique, separate, and immutable data storage with no sub-processors ensures compliance with local regulations and mitigates the impact of ransomware while guaranteeing continuous data access, business continuity, and fast and effective disaster recovery. Headquartered in Copenhagen with offices and data centers worldwide, over ten thousand companies trust Keepit for its ease of use and effortless backup and recovery of cloud data. To learn more visit: **www.keepit.com**

Let's Secure is a service offered by Softjoy AB, an innovation company based at Uminova Innovation and proud members of the Cybernode initiative by MSB and NCC-SE. Founded by experienced tech entrepreneurs, the company's mission is to help Swedish companies and organizations strengthen their defenses against Business Email Compromise (BEC) and enhance resilience against cyber-attacks targeting DNS, email, and web services. Archive a more secure IT environment by improving what you already have rather than starting over or investing in completely new systems. With our service, you become a smarter purchaser, ensuring that the work you commission is carried out correctly. To leran more visit: **www.softjoy.se**

SensorFleet is the first truly open Network Detection and Response (NDR) platform in the market. Over 100 end user organisations are protecting their critical networks in both IT and OT with our solution.

● SensorFleet solution enables users to run multiple NDR tools on a single platform as Instruments.
● Currently, 12 Instruments are available out of the box, including leading IDS's like Suricata and Zeek, Asset monitoring, traffic recording, Netflow collection and more.
● Open integration interfaces to other security solutions, such as SIEM and Threat Intel platforms, ensure alignment with the existing security investments
● Computing platform agnostic software runs on any x86 architecture, including the common Hypervisors
● Scales from the small OT network segments to Datacenters
To learn more visit: **www.sensorfleet.com**

SensorFu's philosophy is rooted in the idea of going back to the basics of cyber security. Building and maintaining secure business-critical networks can feel overwhelming in an increasingly complex world. At SensorFu, we understand that challenge. We're here to bring you simplicity, proactive visibility, and confidence in your network defences.
Our product SensorFu Beacon is a solution for proactive and continuous validation of network isolation and segmentation. It is used in business-critical environments, such as industrial OT and ICS networks, SCADA systems and other environments which demand reliability of network segmentation without risking the availability of operations. To learn more visit **www.sensorfu.com**

SentinelOne (NYSE:S) is pioneering autonomous cybersecurity to prevent, detect, and respond to cyber attacks at faster speed, greater scale, and higher accuracy than human-powered technology alone. The Singularity Platform empowers enterprises to achieve greater visibility of their dynamic attack surfaces, including endpoints, cloud workloads, containers, identity, and mobile & network-connected devices, and take action in real time with AI-powered automation and cross-platform correlation. Over 10,000 customers, including 4 of the Fortune 10, hundreds of the Global 2000, prominent governments, healthcare providers, and educational institutions, trust SentinelOne to bring their defenses into the future, gaining more capability with less complexity. EC-Council invented the Certified Ethical Hacker(C|EH). Founded in 2001 in response to 9/11, EC-Council's mission is to provide the training and certifications to apprentice and experienced cybersecurity professionals to keep corporations, government agencies, and others who employ them safe from attack.

Best known for its Certified Ethical Hacker program, EC-Council today offers 200 different trainings, certificates, and degrees in everything from Computer Forensic Investigation and Security Analysis to Threat Intelligence and Information Security. An ISO/IEC 17024 Accredited Organization recognized under the United States Department of Defense Directive 8140/8570 and many other authoritative cybersecurity bodies worldwide, the company has certified over 380,000 professionals across the globe. Trusted by seven of the Fortune 10, half of the Fortune 100, and the intelligence communities of 140 nations. EC Council is the gold standard in cybersecurity education and certification.
